Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Commissioners,

We have solar panels which have reduced our contribution to climate change and have inspired a 3 other families to also install panels. We pay for using the Duke power grid. In fact they raised the connection fee this year. They are trying to squash nascent competition from homeowners and businesses. They shouldn't have it both ways - lobbying for laws to require connection to the grid and then plotting to raise fees to make them unattractive to homeowners!!

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Clifford Eng
