Subject: DOCKET #20200219-E1 Prevent Utility Shutoffs

Hello,

I am an intern with ReThink Energy Florida and I am writing to voice my opposition to electric power disconnections during this ongoing pandemic and economic crisis. Many Floridians are falling behind on their utility payments due to circumstances outside of their control. My family is not currently in this situation but we have been in a situation like this before. Imagine the children that are forced to be doing schoolwork at home right now, imagine the parents working from home or even worse those who have been laid off from their company. I am asking you to act with grace and kindness to these fellow Florida citizens and give them a chance. We are all in this together and we cannot punish those who are already going through hardships. Use your position of power to make your voice heard and protect those in danger.
