Good Afternoon, Antonio Shapple

We will be placing your comments below in consumer correspondence in Docket No. 20200000-OT and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz
Commission Deputy Clerk II
Florida Public Service Commission

Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Net metering must be allowed to continue as it is at present. Solar is the way to go in order to cut down on demand on nuclear power generation (which requires many metric tons of fresh water daily in addition to producing radioactive by-products). The ability to produce power from the sun, through my own investment in a 24kWh system, and feed unused power back to the grid, is crucial to the economic viability of any solar system. Until battery storage technology becomes much less expensive, feeding power back to the grid and getting a credit through net metering is the only way to go.

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,

Antonio Shappley
