Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Supporting net-metering guarantees lower rates for consumers in the coming future. With the transition to a smart grid in the near future all utilities will benefit heavily with preexisting solar in place.

I would like to propose a plan to allow people with exceptional roofs or large roofs to be allowed any size of a system they would like and receive a credit for all excess energy produced at a discounted rate. Home homes and business have the ability to produce over 5-10 times the solar they need but are currently limited to the amount of energy can be sent back to the grid.

This could provide stable cash flow for some solar owners and offer cheap and reliable energy for utilities.

Regards,
Thomas Cusick
