Dear Commissioner Gary F. Clark,

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
Mikie LeHew  
Port Saint Lucie, FL 34987

Dear Commissioner Gary F. Clark,

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets. You and the Commission can help Floridians achieve an economic advantage, and be pro active in reducing the affects of Climate Change.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida. Please work for the people of Florida, and not the utilities you are charged with regulating.

Sincerely,

Dear Commissioner Gary F. Clark,

Powering up our planet with solar power is the most important thing we can do to mitigate climate change which is creating the next great extinction. Your quick action to create additional monetary incentives for private property owners to commit to solar installations on their mostly flat roofs is needed now!

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
George Richard Sharp

Dear Commissioner Gary F. Clark,

Everyone says we need to do more for the environment so I did. I bought 32 panels and a Tesla battery to power my home.

What makes you think it is fair for the power company to charge one price for a kilowatt you use but charge a different price for the kilowatt sent to them. ITS NOT. They can pay what they charge period. Just like I have to have additional insurance because my system is so big. And you want to take away net metering.

Tell you what take net metering away I drop the insurance I'm suppose to carry how about that for trade if not then shut up and leave it alone.

Sincerely,
