Good Morning, David Hastings

We will be placing your comments below in consumer correspondence in Docket No. 20200000-OT and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz
Commission Deputy Clerk II
Florida Public Service Commission

Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

People and businesses across Florida rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives. I installed solar on my house in FL knowing that the energy I put into the grid would be used, and I would be compensated for my contribution.

We know that it is clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,

David Hastings
