Re: Docket # 20200219-EI

On behalf of the Sierra Club's Florida Chapter, our position on this matter is as follows:

The COVID-19 pandemic crisis has been tough on everyone, but especially people who've lost their jobs. Our low-income neighbors, who already pay up to three times more than the average household on home energy costs, are now losing service as the pandemic still affects employment and income.

Instead of terminating service to these neighbors, all Florida investor owned utilities should instead:

1. Extend stays on disconnections through June 1st, 2021 at the earliest.
2. Reconnect customers disconnected from power from March 9th, 2020 through the present, especially residential households.
3. Waive all fees & fines for customers through June 1st, 2021.
4. Extend debt forgiveness to households facing unemployment, ALICE constrained households, and energy-debt burdened households.
5. Establish balance management programs that meet the needs of Floridians based on best practices established in other parts of the country.
6. Provide updated data related to the COVID-19 crisis every month.
7. Set robust energy efficiency goals and programs –specifically those aimed at providing assistance to low-income customers.

Petitions stating this position, with additional comments, are directed to the CEOs of Duke Energy, TECO Emera, and Florida Power & Light. **These 1,044 Florida residents signed these petitions and are attached to this email, along with the individual comments that many people made on the subject.**

I called them all day long and couldn't get someone on the phone. The recording gave me a one time extension for only 2 days which is ridiculous that doesn't help. instead of being due on the 2nd they are now giving me until the 5th. i called to set up a payment plan and the recording said someone will get back to me in ten minutes and it never happened. Amy Horlick	Delray Beach	I work for the Dept. that handles unemployment claims and there are so many people without a safety net right now that are unemployed due to no fault of their own. Their government has largely failed them. Please be a light in the darkness for them.
Karen Mansour	Delray Beach	
S. Reizburg	Delray Beach	Mr Silagy You may legally have the right to cut off the electricity to those that have been unable to pay their electric bills - BUT when America finds itself In the middle of a Global Health Pandemic - and there are a LOT of people who have lost their jobs through no fault of their own - I do NOT believe it is morally right for your company to do this! One important issue is that there are millions of Americans whose children for their safety are not participating in physically going back to school - but they are depending on the electricity to be there so that their children are able to continue their education via online services - with out electricity what are they supposed to do? I understand that you lead a for profit company but maybe your company could choose to not make quite as much of a profit for the year 2020 - in THESE times and in THIS moment - maybe you can actually help your customers instead of attempting to harm them! Thank you for your time!

Jayne Dean	Englewood	
Wilma Katz	Englewood	In this worldwide COVID-19 crisis we all need to help to do something. FPL is in a unique position to help a lot of people. If that affects the bottom line i believe that's an acceptable expense one FPL could and should be proud to incur. Keep the lights on the A/C onand also the frig the stove the micro-wave the tv and the COMPUTERS. Do this for small children mothers dads caretakers the elderly the disabled those looking for jobs for ANY OTHERS HAVING A HARDER TIME RIGHT NOW THAN YOU AND ME! And wear the damn mask! I am a customer and a shareholder and I wrote this message.

Think about those who live alone or who are sick or who need electric to power medical devices or who cling to jobs because they can work at home or to families with children who need to be educated or to parents with children who cannot comprehend and adapt to what is going on and begin to act out or get depressed. I would contribute to a fund to cover the bills of those who legitimately can't pay and who will never be able to pay back an accumulating electricity debt. As a society and a public service company we can do better than this!

Judy Hines	Fort Pierce	I've had my power turned off due to my own stupidity. That was bad enough but to have it shut off due to the incompitance of our own government has got to be humiliating beyond words. These people need some kind of security one place in their lives where they can forget for a few minutes the world we now live in. Shutting off their power just reminds them of their vulnerability and insecurity in todays world. With that came the notion of punishing those who are poor or are in a period of low financial status. Look at the '07/'08 financial crisis" many people were losing their homes because of how the financial sector in the U.S. was irresponsible on top of other things. There were no mass uprisings. Why? Because they were trained to feel like they did something wrong though the reality is they were being punished for mistakes made by those in high offices. However we can certainly sympathize will families who have lost their primary sources of income during this pandemic. We have experienced long power outages in the aftermath of hurricanes and tropical storms. We know that loss of electricity is not "just" an inconvenience - it means enduring sweltering heat rotting food being unable to keep medications such as insulin at the proper temperature losing essential communication (phones computers) - the list goes on and on. For many people electricity can mean the difference between life and death. This national situation is not their fault.

FP&L executives please find a way to keep the power on for so many who have paid their bills on time until this pandemic. Nancy Miller	Palm Beach	
Barbara Johnson	Palm Beach Gardens	
Alex Roger	Palm Beach Gardens	This is NOT an ordinary time and the reason that people are not able to pay their bills is NOT because they are freeloaders or because they are cheap. The people of the communities you claim to serve are suffering loss that is beyond their ability to control. As a part of these communities your company should be prepared to suffer losses as well. If it is the only course of action that FP&L can take to leave Floridians in the heat and dark during a global pandemic then it is only further proof that utilities especially the electrical grid should be nationalized immediately as a matter of national security. As a share holder I would not want that to happen. As a citizen I can hardly argue against it given your intention to refuse to serve the community rather than take losses along with the community.
Shannon Roger	Palm Beach Gardens	
Gayle Swift	Palm City	This pandemic created circumstances that left many without jobs. It is our national social responsibility to assist those in need whose jobs have been interrupted and/or ended in order to fulfill social distancing guidelines as part of our national effort to slow the spread of this deadly disease. Helen Andersen	Parrish	This is an unprecedented time. We must work together to adjust to our “new normal”. By taking proactive steps and looking for opportunities to create innovative solutions we can equitably share the burden of COVID-19 impacts instead of allowing them to fall on the individuals and families hardest hit by the pandemic. Please be our partner in this.
Russell Andersen	Parrish	As a business owner I understand what it means to keep revenues and cashflows up. But in this unprecedented time we as businesses need to really take a look at our values and see that some people's lives are simply getting decimated right now. While a lot of us white-collar workers aren't impacted blue-collar workers are seeing enormous hardship. Many of those have lost their jobs and have no source of revenue. Cutting their power because they can't possibly pay for their bill only puts them further in the hole. This one time I think we as businesses can say that people's lives matter more than increased profits. Sierra Club Florida: Signatures and comments to TECO CEO Nancy Tower:

The COVID-19 pandemic crisis has been tough on everyone, but especially people who've lost their jobs. Our low-income neighbors, who already pay up to three times more than the average household on home energy costs, are now losing service as the pandemic still affects employment and income.

Instead of terminating service to these neighbors, all Florida investor owned utilities should instead:

1. Extend stays on disconnections through June 1st, 2021 at the earliest.
2. Reconnect customers disconnected from power from March 9th, 2020 through the present, especially residential households.
3. Waive all fees & fines for customers through June 1st, 2021.
4. Extend debt forgiveness to households facing unemployment, ALICE constrained households, and energy-debt burdened households.
5. Establish balance management programs that meet the needs of Floridians based on best practices established in other parts of the country.
6. Provide updated data related to the COVID-19 crisis every month.
7. Set robust energy efficiency goals and programs –specifically those aimed at providing assistance to low-income customers.

Please be our partner in this.
Russell Andersen	PARRISH	As a business owner I understand what it means to keep revenues and cashflows up. But in this unprecedented time we as businesses need to really take a look at our values and see that some people's lives are simply getting decimated right now. While a lot of us white-collar workers aren't impacted blue-collar workers are seeing enormous hardship. Many of those have lost their jobs and have no source of revenue. Cutting their power because they can't possibly pay for their bill only puts them further in the hole. This one time I think we as businesses can say that people's lives matter more than increased profits. Cause they either lost their job due to Corvid-19 it isn't their fault this virus caused them to lose their Job. It isn't their fault they can't find another job. It isn't their fault they can't afford to keep up with their bills. It is the fault of Corvid-19 that they can't keep up with their job cause of Corvid. So please don't shut off their power cause of Covid-19 losing thier job to keep up with their bills. Please please don't shut off neighbors power cause of Covid-19. It isn't fair to them and it isn't right that they lose power cause of losing job and not being

		able to keep up with their bills. They are struggling just like everyone else is to keep up with all their bills with little money to live off from the rest of the month due to this virus. It is causing a lot of stress and a lot of aggravation and a lot of worrying. So please do us all a favor and don't cut off their power.
Shamere Pittman	Jasper	I Am a mother of 4 little kids ranging from 8mths old to 10years old. I myself am unable to pay my light bill due to covid and loss of income. It's just not fair that we the people might be in the dark being that we're unable to pay our bills due to loss of income because of covid.

Alex Finkel	Orlando	We are in the midst of an unprecedented global crisis. This is a pandemic the likes of which have not been experienced for over 100 years and which has ramifications throughout our economy. Millions of people through no fault of their own have lost their jobs either temporarily or permanently as a result of the pandemic. Duke should keep in mind that shutting off power to people who are unable to pay their bills in the midst of a pandemic is not only heartless it could exacerbate the problem by forcing people who are otherwise sheltering at home to seek refuge elsewhere. Do not compound the spread of coronavirus. Keep the lights (and the A/C) on for everyone.

Helen Andersen	Parrish	This is an unprecedented time. We must work together to adjust to our "new normal". By taking proactive steps and looking for opportunities to create innovative solutions we can equitably share the burden of COVID-19 impacts instead of allowing them to fall on the individuals and families hardest hit by

		the pandemic. Please be our partner in this.
Russell Andersen	Parrish	As a business owner I understand what it means to keep revenues and cashflows up. But in this unprecedented time we as businesses need to really take a look at our values and see that some people's lives are simply getting decimated right now. While a lot of us white-collar workers aren't impacted blue-collar workers are seeing enormous hardship. Many of those have lost their jobs and have no source of revenue. Cutting their power because they can't possibly pay for their bill only puts them further in the hole. This one time I think we as businesses can say that people's lives matter more than increased profits. Please work with your consumers who can't pay their electric bills and don't resort to shutting off their power in their most urgent time of need.

Richard Beaton	Saint Petersburg	I understand that Duke Energy is a business not a charity but the pandemic has hurt so many people so many of Duke's customers through absolutely no fault of their own. Duke's profit margin is very healthy despite the downturn. The company could afford to extend charitable assistance to those who truly need it and could like write that amount off of taxable revenues recapturing in part at least some of the cost of the assistance to your customers. Please reconsider the company's stance on disconnects fees and fines and energy debt forgiveness.

Duke is a public utility getting its license to operate from the people of Florida and should be more concerned that people are safe from harm than worried about collecting their money at this moment. The Covid Crisis is returning---we should be generous in our thinking not tight-fisted.
