d. FPUC's Position on the Issues

GENERIC CONSERVATION COST RECOVERY ISSUES

ISSUE 1: What are the final conservation cost recovery adjustment true-up amounts for the January 2019 through 2019?

FPUC: The final end of period adjustment true-up amount is an under-recovery of \$115,200, reflecting the difference between the Company's actual under-recovery of \$200,048 and its previously anticipated under-recovery of \$84,848.

ISSUE 2: What are the appropriate conservation adjustment actual/estimated true-up amounts for the period January 2020 through December 2020?

FPUC: The estimated conservation true-up amount for the period January 2020 to December 2020 is an under-recovery of \$109,241.

ISSUE 3: What are the appropriate total conservation adjustment true-up amounts to be collected/refunded from January 2021 through December 2021?

FPUC: The estimated conservation true-up amount to be refunded during the period January 2021 to December 2021 is an under-recovery of \$224,441.

ISSUE 4: What are the total conservation cost recovery amounts to be collected during the period January 2021 through December 2021?

FPUC: FPUC seeks to recover \$959,441 over the period January 2021 through December 2021.

FPUC: Yes. The Commission should approve revised tariffs reflecting the energy conservation cost recovery amounts and establishing energy conservation cost

recovery factors determined to be appropriate in this proceeding. The Commission should direct staff to verify that the revised tariffs are consistent with the Commission's decision.
