Natural gas

[Summary](#) [Forecast](#) [Stats](#) [Download](#) [\(\)](#) [Alerts](#)

Natural gas prices crashed to around \$2.0/MMBtu for the first time since the beginning of August, on the back of a bigger-than-expected storage build last week and expectations of a rise in output as producers in the US Gulf of Mexico prepared to resume operations after Hurricane Sally receded.

How are you keeping your employees focused, engaged and satisfied?

× Tony Robbins

Natural gas

Natural gas accounts for almost a quarter of United States energy consumption. The **NYMEX Division** natural gas futures contract is widely used as a national benchmark price. The futures contract trades in units of 10,000 million British thermal units (mmBtu). The price is based on delivery at the Henry Hub in Louisiana, the
