Subject: PSC Docket No. 20200176 - Say No to Duke CEC

Dear Adam Teitzman,

Power providers are ALWAYS looking for ways to stick it to the consumer, by the pocket book or by rebating solar providers with below market rates when buying back excess production. It's a rigged system that benefits only the stockholders of the fossil fuel industry and its large consumers. It should be stopped because it is unfair and damaging to the environment.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Ted Mckim
