Subject: PSC Docket No. 20200176 - Say No to Duke CEC

Dear Adam Teitzman,

Dear PSC Commission Members:

Unfortunately customers in all areas of business always are picking up the tab for big business. Large corporations continue to prosper while the average and less fortunate residences pay for their shareholder portfolios by increasing prices for merchandise and service. Why? As a senior on limited income, I cannot afford the solar program that would be cost saving to me, yet I will be ask to pay for corporate welfare again.

This reminds me of a recent request from Duke Energy to your board to charge customers for the Coal Ash clean up in Citrus County that we the rate payers had no control over. Duke Energy did not do their due diligence of monitoring well sites.

So you can clearly understand why the majority customers are unset of yet another cost to them without benefit. I strongly urge you to deny this request. My limited monthly income is not their piggy bank.

Kind regards,
Karen Esty

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Karen ESTY
