Subject: Docket Number 20200139-WS

The Florida Public Service Commission's "Rate Case Overview " dated December 2020 contains errors that understate the impact of rate increases by Utilities Inc of Florida. The errors show up in the Questions and Answers section number 5 and 6 respectively. Therein the waste water amounts are correct but the water charges are understated as follows:

Answer No. 5

\$22.38 should be \$40.87

Answer No. 6

\$26.27 should be \$47.96

This error understates the cost impact of the requested rate increase by a negative 13 % which can be significant to someone on a fixed income who is contemplating an actual overall 28% rate increase versus CY2019 rates and combined 166% increase versus CY2016 as currently under review by the PSC.

Thanks,

Charles Tanner
