

Good Day,

I am a resident of Little Gasparilla Island and would like to be included as an interested person regarding Docket Number 20200226-WS, Application for certificate to provide wastewater service in Charlotte County, by "Environmental Utilities, LLC".

Please email to Desi Groover im2jdg@hotmail.com notifications to meetings, notices, and final orders.

I am also concerned regarding the purchase of utility easements. The water service was installed across many private properties without permission and/or compensation, and I would like to know that this will not happen again. As such, it would be my preference that the County would take on this project and eliminate this private company of taking advantage of island residents again!

Thank you,

Desi Groover
