January 10, 2021 Docket number 20200226-SU

To the PSC:

As a homeowner on Little Gasparilla Island, 9776 Alborado Court, I write today in objection to the application for original certificate to provide wastewater service in Charlotte County by Environmental Utilities, LLC.

We object to this being done by a for-profit utility. On top of the gargantuan cost of building a wastewater collection system on an island, we will have to pay his profit.

Little Gasparilla Island is a bridgeless barrier island. A quick look at Google maps will show you that the island is very narrow in places. There are no roads and no vehicular traffic. We don't see how anyone could get the heavy equipment to all parts of the island to install wastewater service. The only barge service charges \$1200

per trip. Imagine the cost of transporting the supplies necessary for a project of this size. As homeowners we know that every cent of this cost will come out of our pockets, in addition to the profit this company will charge on top of its costs.

We do not feel that this private company has the ability to accomplish this project. The Little Gasparilla Island water utility, owned by the persons who have established Environmental Utilities, has never been transparent about its operations. Mr. Jack Boyer and his family, involved in both businesses, are poorly suited to run a consumer oriented utility.

They are extremely difficult to communicate with and do not return phone calls. Their approach to filing for this certificate has been to keep as quiet as possible. They did send a letter to homeowners, as proscribed by the commission rules, but it was not received in time for homeowners to mount a serious objection. The letter was dated December 17 but the hearing was January 5 and many homeowners have yet to receive the letter.

Our main objection at this point is the fact that we have no information whatsoever on what this project will cost or what the cost per month to homeowners will be. It appears that Mr. Boyer does not want to spend a cent on forecasting until he is sure that he will receive the certificate. We do not see good business practices displayed at any level of either of Mr. Boyer's companies. Therefore, we request that his application for certificate of authorization for wastewater service on Little Gasparilla Island be denied.

Thank you.
