Good Morning,

Per your request we have added you to Dkt 20200226-SU as an interested person.

Sincerely,

Brian Schultz  
Commission Deputy Clerk II  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399

Subject: Docket no. 20200226-SU

Please place me on your email list as to developments to the application for wastewater sewer placement. I am a householder on Little Gasparilla Island who objects to this application.

My particular objections include

1. False reasoning for need of wastewater services. Claims that a low density, rural, mostly part time residents, with no agriculture and no industry in this particular area is polluting or cause of red tide is wrong, and not based in science or current water sampling. With no grass, no paved roads, at least on little Gasparilla island, there is no runoff of usual pollutants. Lemon bay drains south to the waterways, there is good water sampling according to the lemon bay waterway south watershed, based on published numbers.
2. Septic systems currently in use are per Florida code.
3. There is no plan for financing from EU.
4. There is no plan for cost.
5. There is no environmental offset plans since the current plans seem to go through environmentally sensitive lands under the inter coastal and DonPedro State park. No plan if there is an accident/break in those lands.

Thank you.
