Subject: Application for certificate by EU,LLC

Docket # 20200226-SU

I am a property owner on Little Gasparilla Island and and filing an objection to to the issuing a Original Wastewater Certificate in Charlotte County to Environmental Utilities, LLC. LGI is barrier island with no connection to the main land except by boat. There are no roads only cart paths to navigate the island. Just to mention a few reasons for the objection: How does the applicant plan on moving the waste back to the main land for treatment, how many lift stations will be need and where will they be placed, are there any contingency plans in the event there a breach in the pipe line especially if it runs under the bay, has access been granted as there are very few public paths, who are the investors putting up the start up money and is is sufficient, does the applicant have the expertise to develop, operate and maintain such an undertaking, any forethought given to the ecological impact? These are just a few reasons why myself and many other property owners are objecting to this application.

Thank you,
Charles Norton
Property Owner
