**Subject:** Docket #20200226-SU

To Whom It May Concern,

I am writing to you as a property owner on Little Gasparilla Island, which is within the service area contained in the application from Environmental Utilities, LLC [EU] for central sewer. Our home was built less than 7 years ago with a new sewage system and drain field. It can easily last for many more years without any issues or danger to the environment. I strongly request that the certificate not be granted for the new sewer project which would require all homeowners to convert against their will and where they would also be assessed a very significant installation fee. This is unfair to all of the homeowners that have recently built a home or for the ones that have replaced their sewage systems within the last 10 years that would gain no benefit to them or the environment with this project.

As a stakeholder in the proposed service area, it is important to take all of these items in to consideration and I therefore request that EU's request for the sewage project certificate be denied.

Yours truly,

Keith & Luci Coker  
9564 & 9566 Buccaneer Trail  
Placida, FL 33946
