Subject: Docket No. 20200181; Modernize Florida's outdated efficiency practices

Dear Florida Public Service Commission,

The time is right to move Florida's efficiency rules into the 21st century and incentivize utilities to bring "next generation" solutions to scale for a smarter grid.

Electric utilities' financial interests need to be brought in line with their customers' bottom lines.

Please level the playing field so energy savings programs compete on a fair basis with capital intensive power plants.

Move us beyond the outdated cost tests of evaluating efficiency programs, which take real efficiency savings off the table.

And put Florida's most vulnerable customers first by ensuring energy security and affordability for the elderly and low income families.

Thank You.

Sincerely,  
Michael Lydon  
7650 128th St Seminole, FL 33776-4105
