COMMISSION
CLERK

To Whom it May Concern,

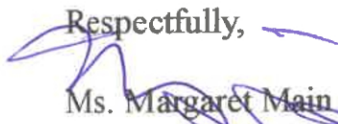

I am writing to you as a property owner which is in the service area contained in the application from Environmental Utility (EU) LLC for central sewer.

I vehemently object to the installation of central sewer on Little Gasparilla Island. The mere PHYSICAL impact of the laying of pipe may have a disastrous outcome on the hard pad of the island which alone may worsen flooding during high tides and heavy rains.

More importantly, is adding to the burgeoning and failing waste water treatment systems in Florida, a prudent decision. A properly installed and maintained septic system is far more environmentally suitable for the management of waste water on a barrier island like Little Gasparilla, given the current status of Florida's failing waste water treatment.

We propose a commitment to inspect, improve and or upgrade our current septic systems.

Respectfully,

Ms. Margaret Main

Dr. Daniel McMaster
Property Owners
Little Gasparilla Island

P.S. WE HAVE AN AEROBIC SEPTIC SYSTEM
THAT IS INSPECTED 4x year AT AN
EXPENSE OF \$400.-
