Notes

To whom it may concern,

Your wonderful water always has sand in the lines.

We have new toilets and the sand plugs up the intake valve to always keep your water flowing into the toilets.

We have to change the intake valve at least every 8 months. The valve costs \$20.00 each and doesn't last for a year plus having a plumber install it. So why would we want to spend more money on your precious water.

Richard E. Scholtz
