Dear CommIssioner Gary Clark, Please explain your position supporting the Duke Energy Plan for solar plants.

It is hard to understand why the Public Service Commission would approve a Duke plan at \$1.8 billion for a 750 megawatt project, when it had previously approved a Fla Pwr & Light project for \$1.8 billion for 1,490 megawatts.

The commission is supposed to protect the public from being taken advantage of by inefficient utilities, which are monopolies.

Thank you.

Dear Chairman Gary F. Clark,

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Nancy Perry

Dear Chairman Gary F. Clark,

Why are we subsidizing big corporations? They've already received big tax cuts, COVID funds. Walmart can pay their way.
