Florida Bar No. 0773301

QUESTION:

Please refer to Florida Power & Light Company's (FPL or Company) "Mid-Course Correction Petition" (MCC Petition), dated February 26, 2021, filed in Docket No. 20210001-EI. The Company's supporting documentation filed with its MCC petition assumes a April 1, 2021 implementation date for new rates. However, the Florida Public Service Commission (Commission) Conference addressing the Company's petition is also contemplated to be April 1, 2021.

a. Hypothetically, if the Company's petition is addressed at the April 1, 2021 Commission Conference, but ultimately the Commission decides on an alternative effective date of May 1, 2021, what would be the effect on the Company's current proposal? Please also specifically remark on the effect to a typical monthly residential customer using 1,000 kWh of electricity.

b. Please submit an alternative/updated Appendix A and alternative/updated Appendix C to the MCC Petition that assumes a May 1, 2021 implementation date for new fuel factors.

c. If the MCC petition is approved, please describe the Company's timeline and process for notifying customers of the change to fuel factors.

RESPONSE:

a. If the Commission determines that the effective date of FPL's fuel midcourse correction factors should be May 1, 2021 versus April 1, 2021, the \$302.6 million projected end of period true-up under-recovery would be recovered over a shorter period, thereby increasing the impact on customer bills.

The non-time differentiated fuel factor would increase \$0.037 cents per kWh, from 2.792 cents per kWh for an April 1 effective date to 2.829 cents per kWh for a May 1 effective date. Similarly, the time differentiated fuel factors would increase from 3.202 cents per kWh for on-peak and 2.613 cents per kWh for off-peak for an April 1 effective date to 3.245 cents per kWh for on-peak and 2.648 cents per kWh for off-peak for a May 1 effective date.

FPL's typical monthly residential 1,000 kWh bill would increase \$0.38 from \$102.64 based on an April 1 effective date to \$103.02 based on a May 1 effective date, for a total increase of \$3.97 from the current \$99.05 bill. Similarly, typical commercial and industrial customer bill impacts would increase 0.4% to 0.9% for a May effective date, from a range of 3.6%-7.8% to a range of 4.0% to 8.6%.

- b. Please see Attachments I and II to this Data Request. Attachment I provides a complete set of midcourse correction schedules, which includes revised schedules E1-A, RS-1 Inverted Rate Computation, E-1E pages 1 of 2 and 2 of 2 and E10. Attachment II provides revised tariff sheets.
- c. All customers are currently being notified of a proposed rate change in their March 2021 bill (see response to Staff's First Data Request, No. 6). The March bill message directs customers to FPL's website (FPL.com/rates) where the proposed rate changes are posted for residential and business customers. Should the Commission approve the request effective May 1, 2021, the website will be updated to show that rates will be effective May 1 rather than April 1. Additionally, the Company will notify customers in the April billing cycle that the rates have been approved to change on May 1 and direct them to the updated rates on its website, FPL.com/rates. Customers will also be notified in the next quarterly residential and business newsletters, see Attachment III. The quarterly newsletters provided in Attachment III were inadvertently omitted in response to Staff's First Data Request, No. 6.

Tools to help you save

We offer several programs that can help you save energy and money. Here are just a few of our services:

- » The FPL Energy Analyzer is a free tool that provides an estimated breakdown of how much you're spending on appliances, cooling and heating. You'll also receive expert tips and recommendations to help you save on your bill. Visit: >> [FPL.com/EnergyAnalyzer](https://www.fpl.com/EnergyAnalyzer)
 - FPL also offers a free in-home evaluation*. Our energy expert will visit your home to identify energy-saving opportunities and rebates available that can help improve your home's energy efficiency. Call 800-DIAL-FPL (800-342-5375).
- » Computer-Assisted Survey*: An in-home evaluation at a cost of \$15. We estimate potential savings, installation costs and the payback period for each recommendation.

A Building Energy Rating System survey is also available*. It rates your home according to the current Florida energy-efficiency code requirements for new home construction and may help you qualify for improved mortgage options or increase your home's resale value.

- » New or existing homes can apply for a Class 1 or 2 rating survey, which involves an on-site inspection. The cost for homes up to 2,000 square feet** is \$480, or \$555 with an air-conditioning duct leakage test, which includes one handler. An incremental \$35 is charged for each additional handler.
- » At a cost of \$75, the Class 3 rating option is for new construction only and is based on site plans and construction documents.

* Due to COVID-19 safety issues, certain services may not be available in your area.

** For Class 1 and 2 surveys, there is an additional charge of 8 cents per square foot for homes greater than 2,000 square feet, or 3 cents per square foot for a Class 3 survey.

Evacuation help for special needs customers

With storm season approaching, it's important to be prepared. If you or anyone you know has special needs and requires assistance in case of evacuation, your local government can help.

Be prepared: >> [FPL.com/evacuation-assistance](https://www.fpl.com/evacuation-assistance)

EnergyNews A QUARTERLY PUBLICATION
FOR YOUR HOME & FAMILY

Innovation pays off — for you, and the next generation

The next generation is more than smart — they're savvy. They know value when they see it, and it goes far beyond your wallet.

They expect and demand more, like getting even cleaner energy. And we're delivering just that! We've ended the use of coal in Florida. We use American-made natural gas, making foreign oil a thing of the past. And we have a plan for a zero-carbon-emissions fuel made from solar and water, called green hydrogen.

With tomorrow just around the corner, the innovations and investments of today set the course for Florida's energy future. FPL has saved customers billions in operational costs by finding more sustainable and efficient ways to deliver energy that's not just clean or reliable, but also affordable. This doesn't happen by accident. Instead, it's the direct result of smart, long-term investments that reduce costs and improve efficiencies. Even as the price of many goods and services increases year after year — often with little to no warning — the price of electricity from FPL has come down over the last 15 years.

Building a sustainable energy future through investments in more fuel-efficient power plants, solar and energy storage drives down costs over the long term.

Meeting Florida's growing needs while delivering you savings requires planning, preparing and investing, and we remain committed to providing our customers unparalleled value.

Now that's a future Florida, and the next generation, can depend on.

For more information visit: >> [FPL.com/value](https://www.fpl.com/value)

Where does your energy come from?

FPL's power comes from a variety of sources, including clean, U.S.-produced natural gas and emissions-free nuclear and solar. Today we're taking steps to substantially increase our investment in cost-effective solar while eliminating our use of coal.

Our latest fuel mix compared to the rest of the nation:

FUEL	FPL ¹	U.S. ²
Coal:	1.25%	23.4%
Oil:	0.09%	0.4%
Solar:	2.86%	1.7%
Natural Gas:	72.66%	38.4%
Nuclear:	21.52%	19.6%
Purchased Power:	1.62%	0%
Wind:	0%	7.1%

¹ Sources of electricity generation for the 12 months between Jan. 2020 and Dec. 2020.

² Major energy sources and percent share of total U.S. electricity generation in 2019.

Ready for 'spring trimming'?

We encourage all customers this spring to safely participate in the "spring trimming" of trees and vegetation before they get too close to power lines.

Trees and other vegetation are a leading cause of power outages. In fact, trees were the number one cause of outages during Hurricane Irma in 2017. Most of the outages were caused by trees from beyond the areas FPL maintains.

Property owners are responsible for safely maintaining their trees and vegetation on their property and keeping them away from power lines. Never trim vegetation that has grown near a power line but hire a qualified, specially trained line-clearing professional to do the job.

Stay safe. Always keep yourself and any object you are touching at least 10 feet from main and neighborhood power lines and 30 feet from higher-voltage transmission lines.

Homeowners can help by following FPL's Right Tree/Right Place guidelines at FPL.com/trees to reduce the risk of vegetation causing power interruptions.

For more information, and to take our interactive quiz on trimming, visit: FPL.com/treequiz

Stay informed with our Medically Essential Service

If you or someone you know is dependent on electric-powered medical equipment, let us know. Our Medically Essential Service will help keep those with special needs informed by providing extra services, such as special notifications before a hurricane. It's important to note, the program does not guarantee service nor provide an exemption from paying electric bills.

Apply today: FPL.com/MESP

Beware: Scams are on the rise

Scammers are aggressively targeting utility company customers across Florida. Be suspicious of a caller demanding you pay your electric bill with only a specific payment option. This is a scam. If you receive a call asking for immediate payment, hang up and call the number on your FPL bill for verification. We offer all of our customers several easy ways to pay.

Learn more: FPL.com/protect

SECOND QUARTER 2021

EnergyNotes

A QUARTERLY PUBLICATION
FOR YOUR BUSINESS

The business of keeping bills low

As you continue facing more and different challenges these days as a business owner, one constant will be FPL working to keep your bills low.

FPL has saved customers billions in operational costs by finding more sustainable and efficient ways to deliver energy that's not just clean or reliable, but also affordable. This doesn't happen by accident. Instead, it's the direct result of smart, long-term investments that reduce costs and improve efficiencies. Even as the price of many goods and services increases year after year — often with little to no warning — the price you pay for the FPL energy you use every day is lower than 15 years ago. And you can count on that reliable, clean energy at an affordable price for years to come, with bills remaining below the national average through 2025.

The innovations and investments of today set the course for Florida's energy future. We've ended the use of coal in Florida. We use American-made natural gas, making foreign oil a thing of the past. And we have a plan for a zero-carbon-emissions fuel made from solar and water, called green hydrogen. Building a sustainable energy future through investments in more fuel-efficient power plants, solar and energy storage drives down costs over the long term. Meeting Florida's growing needs while delivering you savings requires planning, preparing and investing, and we remain committed to providing our customers unparalleled value. Now that's a future Florida, and you, can depend on.

Time-of-use peak hours change in April

If your business is on the time-of-use rate, don't forget on-peak hours have shifted. From April 1 to Oct. 31, on-peak hours are Monday through Friday from noon to 9 p.m., excluding Memorial Day, Independence Day and Labor Day. To learn more about time-of-use or other rates, visit: [» FPL.com/TOU](https://www.fpl.com/TOU)

Ready for 'spring trimming'?

This spring, we encourage all customers to safely participate in the "spring trimming" of trees and vegetation before they interfere with power lines.

Trees and other vegetation are a leading cause of power outages. In fact, trees were the number one cause of outages during Hurricane Irma in 2017. While FPL keeps power lines clear in public rights-of-way or easements, most damage came from trees beyond the area FPL maintains.

Property owners are responsible for safely maintaining trees and vegetation on their property and keeping them away from power lines. Never trim vegetation that has grown near a power line but hire a qualified, specially trained line-clearing professional to do the job.

Stay safe. Always keep yourself and any object you are touching at least 10 feet from main and neighborhood power lines and 30 feet from higher-voltage transmission lines.

Property owners can help by following FPL's Right Tree/Right Place guidelines to reduce the risk of vegetation causing power interruptions.

For more information, and to take our interactive quiz on trimming, visit: [» FPL.com/treequiz](https://www.fpl.com/treequiz)

QUESTION:

Please refer to page five of the MCC Petition. Given the forward natural gas price movements since the Company obtained market information to develop its MCC petition, does the Company believe the data obtained February 19, 2021, is still suitable or representative of future fuel cost expectations for the remainder of the year?

RESPONSE:

Given the level of volatility that has existed in the natural gas market over the last several months, FPL believes the fuel prices that were used in its February 26, 2021 MCC filing continue to be representative of future fuel cost expectations at this point. FPL will continue to monitor the natural gas market and the impact that price movements have on its projected fuel costs and will take the appropriate steps if significant changes occur to its future fuel cost expectations.
