COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

This is probably not the right place for this, but it is hard to find out where one should object to proposed rate increases, so here goes. Please forward this the appropriate agency if this is not correct.

I strongly object to FPL's proposed increase to the base rate or "customer charge" for electric service. The cost of generating power should be reflected in the actual cost of that power, not in the cost of simply being a customer. FPL is attempting to protect itself from competition while cloaking it under a claim of producing "green" power. It is nonsense. They should be forced to charge a rate that reflects their costs. They should never be allowed to pay for capital improvements through the monthly "customer charge".
