I find it repulsive that telco is wanting a 18% rate increase when we are in recession and probably heading for a depression. I got a 1.5% raise on my social security check. The utilities were left in good shape by the Trump administration with big tax cuts and low coal and gas prices. I use to brag about teco compared to duke which are the biggest crooks going here and up north. They can't get off this clean energy kick with more solar panels next will be windmills. How did that all work in Texas I don't want to be setting here with no power and in the heat. I new as soon as Biden got rolling with the epa bullshit this would start happening. I am a retired licensed steam engineer you can't abandon these power plant you just don't turn on a switch and everything comes on line. I contacted teco and gave them my opinion. I hope you see though there bullshit. If they want to put in all these solar panels let the stockholders pay for it. While I have your attention Hillsboro county is also wanting to raise everyone's water and sewer rates 4% a year for the next 4 years. They say need money for new customers and new lines etc. let them put on more tap on fees plus get these contractors that developing all these homes and ruining our living standards pay for itsame goes for for the electric companies. I hope make a stand for the customers. David & Mary Dittmer 1937 east view dr sun city center, Florida 33573 dwdit47@yahoo.com 812 655 3739

I cannot believe that you would even consider another rate increase for TECO. Everyone seems to forget that they are a MONOPOLY. In their assigned area they have no competition. However they seem to spend millions on advertising in newspapers, on TV and other media. Why would you need to advertise when you have no competition and everyone in your area has to have your service. Put that money into the upgrades and changes needed and do not raise the rates to the consumer.

This is so obvious that I am sure they spend money on political influence as well. It is ridiculous.
Please reject any new rate increases

Thanks
John Lea
