Re: Environmental Cost Recovery Clause
FPSC Docket No. 20210007-EI

Dear Mr. Teitzman:

Attached for filing in the above docket on behalf of Tampa Electric Company are the following:

1. Amended Petition for approval of the company's environmental cost recovery true-up amount for the twelve-month period ending December 2020; and
2. Revised Prepared Direct Testimony of M. Ashley Sizemore.

The only change in the Amended Petition is the amount of the over-recovery, changing from \$4,237,074 as reflected in the initial Petition to \$4,237,191 in the Amended Petition. This change results from a revision in capital expenditures for Coal Combustion Residual Rule - Phase II as shown on Schedule 42-8A p.27, by \$36,010, representing the reversal of an invoice that was charged to the project in error. The impact on recoverable costs for the period related to this revision is \$117 increase in the over-recovered amount.

Thank you for your assistance in connection with this matter.

Sincerely,

James D. Beasley

ATTORNEY

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Environmental Cost)
Recovery Clause.)
_____)

DOCKET NO. 20210007-EI

FILED: June 7, 2021

AMENDED PETITION OF TAMPA ELECTRIC COMPANY

Tampa Electric Company ("Tampa Electric" or "the company"), hereby petitions the Commission for approval of the company's environmental cost recovery true-up amount of \$4,237,191 over-recovery for the twelve-month period ending December 2020. In support of thereof, says:

Environmental Cost Recovery

1. Tampa Electric's final true-up amount for the January 2020 through December 2020 period is an over-recovery of \$4,237,191. [See Exhibit No. ____ (MAS-1), Document No. 1 (Schedule 42-1A).]

2. By Order No. PSC-2020-0433-FOF-EI, the Commission approved environmental cost recovery factors for the period commencing January 2022. These factors reflected an actual/estimated true-up under-recovery, including interest, for the period January 2020 through December 2020 of \$7,841,176 which was also approved in Order No. PSC-2020-0433-FOF-EI. The actual under-recovery, including interest, for the period January 2020 through December 2020 is \$3,603,985. The \$3,603,985 actual under-recovery, less the estimated under-recovery of \$7,841,176 which is currently reflected in charges for the twelve-month period beginning January 2022, results in a net environmental cost recovery true-up over-recovery of \$4,237,191 that is to be included in the calculation of the environmental cost recovery factors for the period beginning January 2022.

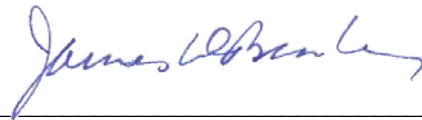

3. For reasons more fully detailed in the Prepared Direct Testimony of witness M. Ashley Sizemore, the environmental compliance costs sought to be approved for cost recovery

proposed in this petition are consistent with the provisions of Section 366.8255, Florida Statutes, and with prior rulings by the Commission with respect to environmental compliance cost recovery for Tampa Electric and other investor-owned utilities.

WHEREFORE, Tampa Electric Company requests the Commission to approve the company's environmental cost recovery true-up amount of \$4,237,191 over-recovery and authorize the inclusion of this amount in the calculation of the environmental cost recovery factors for the period beginning January 2022.

DATED this 7th day of June 2021.

Respectfully submitted,

JAMES D. BEASLEY

in Customer Experience, I managed billing and payment customer solutions, products and services. I returned to the Regulatory Affairs Department in 2020 as Manager, Rates. My duties entail managing cost recovery for fuel and purchased power, interchange sales, capacity payments, and approved environmental projects. I have over ten years of electric utility experience in the areas of customer experience and project management as well as the management of fuel clause and purchased power, capacity, and environmental cost recovery clauses.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present, for Commission review and approval, the actual true-up amount for the Environmental Cost Recovery Clause ("Environmental Clause") and the calculations associated with the environmental compliance activities for the January 2020 through December 2020 period.

Q. Did you prepare any exhibits in support of your testimony?

A. Yes. Exhibit No. MAS-1 consists of nine documents prepared under my direction and supervision.

- Form 42-1A, Document No. 1, provides the final true-

- up for the January 2020 through December 2020 period;
- Form 42-2A, Document No. 2, provides the detailed calculation of the actual true-up for the period;
- Form 42-3A, Document No. 3, shows the interest provision calculation for the period;
- Form 42-4A, Document No. 4, provides the variances between actual and actual/estimated costs for O&M activities;
- Form 42-5A, Document No. 5, provides a summary of actual monthly O&M activity costs for the period;
- Form 42-6A, Document No. 6, provides the variances between actual and actual/estimated costs for capital investment projects;
- Form 42-7A, Document No. 7, presents a summary of actual monthly costs for capital investment projects for the period;
- Form 42-8A, Document No. 8, pages 1 through 29, illustrates the calculation of depreciation expense and return on capital investment for each project recovered through the Environmental Clause.
- Form 42-9A, Document No. 9, details Tampa Electric's revenue requirement rate of return for capital projects recovered through the Environmental Clause.

Q. What is the source of the data presented in your testimony

25

and exhibits?

A. Unless otherwise indicated, the actual data is taken from the books and records of Tampa Electric. The books and records are kept in the regular course of business in accordance with generally accepted accounting principles and practices, and provisions of the Uniform System of Accounts as prescribed by this Commission.

Q. What is the final true-up amount for the Environmental Clause for the period January 2020 through December 2020?

A. The final true-up amount for the Environmental Clause for the period January 2020 through December 2020 is an over-recovery of \$4,237,191. The actual environmental cost under-recovery, including interest, is \$3,603,985 for the period January 2020 through December 2020, as identified in Form 42-1A. This amount, less the \$7,841,176 under-recovery approved in Commission Order No. PSC-2020-0433-FOF-EI, issued November 13, 2020, in Docket No. 20200007-EI, results in a final over-recovery of \$4,237,191, as shown on Form 42-1A. This over-recovery amount will be applied in the calculation of the environmental cost recovery factors for the period January 2022 through December 2022.

1 Q. Are all costs listed in Forms 42-4A through 42-8A incurred
2 for environmental compliance projects approved by the
3 Commission?

4
5 A. Yes. All costs listed in Forms 42-4A through 42-8A for
6 which Tampa Electric is seeking recovery are incurred for
7 environmental compliance projects approved by the
8 Commission.

9
10 Q. How do actual expenditures for the January 2020 through
11 December 2020 period compare with Tampa Electric's
12 actual/estimated projections as presented in previous
13 testimony and exhibits?

14
15 A. As shown on Form 42-4A, total costs for O&M activities are
16 \$3,216,922, or 18.3 percent less than the actual/estimated
17 projection costs. Form 42-6A shows the total capital
18 investment costs are \$118,847, or 0.3 percent less than the
19 actual/estimated projection costs. Additional information
20 regarding substantial variances is provided below.

21
22 **O&M Project Variances**

23 O&M expense projections related to planned maintenance work
24 are typically spread across the period in question.
25 However, the company always inspects the units to ensure

1 that the maintenance is needed, before beginning the work.
2 The need varies according to the actual usage and associated
3 "wear and tear" on the units. If an inspection indicates
4 that the maintenance is not yet needed or if additional
5 work is needed, then the company will have a variance when
6 actual amounts expended are compared to the projection.
7 When inspections indicate that work is not needed now, then
8 maintenance expense will be incurred in a future period
9 when warranted by the condition of the unit.

10
11 **▪ Big Bend Unit 3 Flue Gas Desulfurization Integration:**

12 The Big Bend Unit 3 Flue Gas Desulfurization Integration
13 project variance is \$108,626 or 38.7 percent less than
14 projected. The variance is due to less maintenance costs
15 incurred than expected while operating the unit on
16 natural gas instead of coal.

17
18 **▪ SO2 Emission Allowances:** The SO2 Emission Allowance
19 variance is \$37 or 209.2 percent greater than projected.
20 The variance is primarily attributable to differences in
21 the calculated estimate for 2020 and the actual activity
22 for the period.

23
24 **▪ Big Bend Units 1 & 2 FGD:** The Big Bend Units 1 & 2 FGD
25 project variance is \$114,486, or 82.4 percent less than

1 projected. The variance is due to less maintenance costs
2 incurred than expected while operating the unit on
3 natural gas instead of coal.

4
5 **Big Bend PM Minimization and Monitoring:** The Big Bend
6 Minimization and Monitoring project variance is
7 \$104,870, or 34.8 percent less than projected. The
8 variance is due to less maintenance costs while operating
9 on natural gas instead of coal.

10
11 **Big Bend NOx Emission Reduction:** The Big Bend NOx
12 Emission Reduction project variance is \$6,000, or 99.9%
13 percent less than projected. The variance is due to less
14 maintenance costs while operating on natural gas instead
15 of coal.

16
17 **Bayside SCR Consumables:** The Bayside SCR Consumables
18 project variance is \$16,661, or 17.9 percent greater than
19 projected. The variance is due to the units running more
20 in the summer than projected, increasing ammonia use.

21
22 **Big Bend Unit 1 Pre-SCR:** The Big Bend Unit 1 Pre-SCR
23 project variance is \$5,400, or 100 percent lower than
24 projected. The variance is due to reduced operating hours
25 for Unit 1 during the year.

22
23
24
25

- **Big Bend Unit 2 Pre-SCR:** The Big Bend Unit 2 Pre-SCR project variance is \$5,400, or 87.4 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.

- **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR project variance is \$6,000, or 88 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.

- **Clean Water Act Section 316(b) Phase II Study:** The Clean Water Act Section 316(b) Phase II Study project variance is \$16,664, or 59.3 percent less than projected. The variance is due to the delay in receiving final the NPDES Permit leading to fewer expenditure than anticipated.

- **Arsenic Groundwater Standard Program:** The Arsenic Groundwater Standard Program project variance is \$15,426, or 97.3 percent greater than projected. The variance is due to a replacement well not associated with the program being inadvertently charged during the period. The charge was subsequently reversed and will be reflected in the upcoming Actual/Estimate Projection filing.

18
19
20
21
22
23
24
25

- **Big Bend Unit 1 SCR:** The Big Bend Unit 1 SCR project variance is \$70,977, or 81.1 percent less than projected. The variance is due to reduced operating hours for Unit 1 during the year.

- **Big Bend Unit 2 SCR:** The Big Bend Unit 2 SCR project variance is \$109,585, or 43.5 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.

- **Big Bend Unit 3 SCR:** The Big Bend Unit 3 SCR project variance is \$108,523, or 23.7 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.

- **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project variance is \$224,108, or 30.8 percent less than projected. The variance is due to fewer unit operating hours than projected, resulting in lower expenditures for SCR consumables and maintenance than projected.

- **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum Storage Facility project variance is \$430,513, or 54.1 percent less than projected. The variance is due to less facility yard maintenance being required than expected

1 as energy generation by coal was less than projected.

2

3 ▪ **Big Bend Coal Combustion Residuals Rule:** The Big Bend
4 Coal Combustion Residuals ("CCR") Rule project variance
5 is \$1,008,729, or 15809.2 percent greater than
6 projected. This variance is due to timing. Costs
7 associated with activity that was previously deferred
8 were spent in 2020.

9

10 ▪ **Big Bend Coal Combustion Residuals Rule Phase II:** The
11 Big Bend Coal Combustion Residuals ("CCR") Rule Phase
12 II project variance is \$2,946,683, or 20.7 percent less
13 than projected. This variance is due to timing
14 differences in the project schedule when compared to the
15 original projection. Project disposal activities have
16 occurred more slowly than originally projected. The
17 project expenditures are still needed and will be
18 incurred in the future.

19

20 **Capital Investment Project Variances**

21 ▪ **Big Bend CCR Rule:** The Big Bend CCR Rule project variance
22 is \$25,850, or 15 percent less than projected. This
23 variance is due to timing differences in the project
24 schedule when compared to the original projection. The
25 project expenditures are still needed and will be

1 incurred in the future.

2

3 ▪ **Big Bend Unit CCR Rule Phase II:** The Big Bend CCR Rule
4 Phase II project variance is \$39,406, or 36.3 percent
5 less than projected. This variance is due to timing
6 differences in the project schedule when compared to the
7 original projection. The project expenditures are still
8 needed and will be incurred in the future.

9

10 ▪ **Big Bend ELG Compliance:** The Big Bend ELG Compliance
11 Project variance is \$52,834, or 66.6 percent less than
12 projected. This variance is due to timing differences
13 in the project schedule when compared to the original
14 projection. Project activities have occurred more slowly
15 than originally projected due to permitting delays. FDEP
16 issued its permit regarding the project on April 10,
17 2020. The project expenditures are still needed and will
18 be incurred in the future.

19

20 **Q.** Does this conclude your testimony?

21

22 **A.** Yes, it does.

23
