CONSUMER COMMENTS	
As a Florida resident, I firmly object to a rate hike for the following reasons:	
1) As a monopoly you can recover cost w/out increasing rates	
2) As a subsidiary of Next Era, a publicly traded co with the largest renewable portfolio, you are still depending on 74% natural gas (in the winter - 1) the winter and many families especially low income will be impacted by the volatility and low social contract places the burden on	
3) Your financials state otherwise (*26.6 K/E)

Complaint: Other Complaint against Florida Power & Light Company
Details:

I just found out via reading my AARP magazine that FPL has requested an increase of 2Billion in the base rate over the next 4 years. That is an incredible amount. I am a senior who moved here because of the no state tax law but am finding so many other taxes that impact my fixed income. Please someone needs to consider how seniors are greatly affected and cannot afford this hike in prices. Thank you for the opportunity for me to make my concern known.

Details:

It has been reported through AARP of Florida that Florida Power and Light are planning a \$2 billion increase within the next 4 years. Up to this point, we have enjoyed excellent and affordable electric rates being seniors in Florida. The television ads of late propose rate reductions, so it is concerning of hearing of this proposed rate hike. Thank you for your consideration in reviewing the amount of the future rate hikes over the next 4 years. Jesse M Moreno

Comments:

Florida Power & Light is asking for the largest single rate hike in Florida history at a time when consumers are facing an increased cost of goods and services as we recover from the economic downturn caused by COVID-19. Increasing the cost of electricity is something you, the Public Service Commission, can control.

It is unconscionable to think that we should have to pay more for our electric service at a time like this. Rubber stamping an all-time high return on equity of 11.5 percent goes against helping struggling Floridians. Putting people over profits should come first.

Now is not the time to give FPL what it wants; let's keep the public in Public Service Commission!

Subject: Proposed increases to your consumers. ref: docket 20210015EL

As a subscriber to FPL, I am not pleased to understand the current requests for increasing the price of the electricity you produce and provide for you 1.6 million users.

The proposed minimum stock holder investment return is obscene. When do investors get a guarantee on their investments? The proposal is far and away the highest ROV in the industry. I am against that.

Your proposed 4.4 billion dollar base rate increase is also obscene and will further burden your users. Your profits throughout this Covid pandemic have been astonishing. Your greed is most evident with these current proposals. I would implore the commission to deny your requests. Consumers are unfortunately captive to your whims and pay an unfair and costly price for your money hungry investors and politicians Sheldon Gofberg

As a Floridian on a fixed income, the increase of \$2 billion FP&L is asking for could cause a financial burden on my wife and I. We do not want to pay higher energy costs. Keep costs in line and minimize increases.
