Subject: Stop Rubber Stamping FPL Requests!

Dear Commissioner

Florida Power & Light is asking for the largest single rate hike in Florida history at a time when consumers are facing an increased cost of goods and services as we recover from the economic downturn caused by COVID-19. Increasing the cost of electricity is something you, the Public Service Commission, can control.

It is unconscionable to think that we should have to pay more for our electric service at a time like this. Rubber stamping an all-time high return on equity of 11.5 percent goes against helping struggling Floridians. Putting people over profits should come first.

Now is not the time to give FPL what it wants; let's keep the public in Public Service Commission!

It would be one thing to guaranty an increase that matched the cost-of- living increase that we all face, especially IF Florida Power & Light were doing all in its power (no pun intended) to get away from fossil and dangerous - nuclear - fuels. They have steadfastly refused to change their business model. The only solar panels they are putting up are those that are situated in the Everglades on land that used to be highly-prized national treasure [the like of which exists no where else in the world]. Florida Power & Light has very little respect for the ecosystem and the environment.

Thank you,

Sally Philips
