Subject: Public Comment on Docket #20210015-EI

Dear Public Service Commission,

I strongly believe that FPL is making strong inroads on solar energy. Their request for a huge rate increase though suggests that such inroads are nothing but PR. Otherwise that free solar would not require a rate increase at all. Please be aware that fossil fuels belong in the ground if we are to stop disastrous climate change.

As a resident of Florida, I urge you to decline FPL's rate increase petition, not only because of the unnecessary burden on Florida utility customers recovering from the fallout of a pandemic, but because we reject their spending billions of our dollars to build redundant fossil fuel units, rebuild an already-sufficient transmission system, and give their shareholders a raise.

Please do not put FPL's desire to maximize profits over our need to power our homes sustainably and affordably.

Thank you!

Como residente de Florida, le insto a que rechace la petición de aumento de tarifas de FPL, que crearía una carga innecesaria y excesiva para los clientes de servicios públicos en un momento en que muchos floridianos no pueden pagar más por sus gastos diarios.

FPL está tratando de cobrar a clientes como nosotros por una variedad de proyectos que no queremos ni necesitamos. FPL no necesita gastar miles de millones de dólares para construir unidades de combustibles fósiles redundantes, reconstruir un sistema de transmisión que ya es suficiente y dar un aumento a sus accionistas.

Por favor, no anteponga el deseo de FPL de maximizar las ganancias a nuestra necesidad de alimentar nuestros hogares de manera asequible.

¡Gracias!

Sincerely,
Barbara Ida
