Subject: I am AGAINST the proposed FPL rate increases

South Floridians will be paying more as North Florida customer rates remain flat, all to continue relying primarily on fossil fuels such as natural gas. FPL and its parent company NextEra are already some of the largest and most profitable energy companies in the United States—but they want more. This massive corporation wants to take money out of our pockets and give it to their investors, while further locking Florida into dirty fossil fuel infrastructure.

The price tag for paying for a livable future should not come with fine print that allows the utility's investors to further line their pockets.
