Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

I am in the senior services business and work with seniors that are struggling to survive on their SS checks only. Electricity is essential in Florida and Air Conditioning is necessary for good health here. I see many times the elderly not using a/c in order to keep their bill down, this is a contributing issue to heat exhaustion and mental confusion as their bodies are so hot. IF the rate must be increased there needs to be something put in place to help seniors (65+) with financial need so they are not going without air conditioning.

Thank you,

corina savela
