**Subject:** Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

As a Floridian who has served in local government, I am disappointed that PSEG is continuing its policy of rate increases and of ignoring the energy needs of the public.

It's ads say one thing and the company does another. There is no long term plan for power in the throes of global warming There is repressive policy against home solar energy by means of which they make money on home solar paid for by the public.. The only thing that the company is for is increased profits.

It is a monopoly that avoids doing well by its captured clients.

Thank you,

Mark Needle
