Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

While I appreciate what I understand to be the Commission's reduction of FPL's proposal, I believe that the proposed rate of return of 10.6% is too much in an era where interest rate paid by banks is often less than one percent. From what I know as a person who has invested in utilities from time to time since the 1970's, I believe regulated utilities are all by guaranteed a profit.

Also, Florida calls itself The Sunshine State, yet there is no quantifiable goal for serious increase in solar energy. Really?

Thank you,

Theodore Padgett
