Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

The outrageous rate increase as proposed by FPL is another example of forced additional costs of which we feel we have no control over.

The justification by FPL reads as a "we can do this because we can".

A 20% increase with no regard as to the direct effect of increased cost of our most basic living expenses.

Shame on FPL for trying to justify the much higher 10.53 as proposed? And seemingly without being required to provide full disclosure of where the extra or additional funds above and beyond the rate increase average for a residential bill are being delegated to.

Reasonable increases are one thing. Please consider what you are proposing. We have all suffered enough financially. Many of us senior and disabled citizens, not to mention families simply cannot take another increase. Let alone an "elevated" one. How can FPL do this in good conscience? Please help us not hurt us especially during this most difficult time for our country and FLORIDIANS,

Thank you,

Brenda Ash
