Subject: They Need to Keep Power Bill Low

Dear Commissioner

FPI has one of the highest residential electric rates in the country and yet they are one of the only electric companies that have no carbon emissions. What have they been doing with the money? Putting it in their pocket? It is absolutely wrong to allow these large increases during these difficult economic times.....unless you want people out in the streets. People, their customer base, cannot afford these electric rate increases.

Thank you,

Sharon & Jim Fluet
