Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Our rates are already way too high, among the highest in the country and the deal agreed upon allows FPL a rate increase higher than the national industry average. And Florida has a extremely high senior population struggling to make ends meet on a fixed income so these obscene increases will stress their limited budget.

FPL continues to be the only major utility with no absolute carbon emissions reduction goals, instead committing only to a reduction of carbon “intensity.” Ironically, NextEra (FPL’s parent) invests in clean energy projects around the country. Meanwhile, there is no commitment from FPL to clean up the toxic mess they are creating with their nuclear power plant polluting Biscayne Bay.

If the PSC agrees with the settlement, it will allow FPL to avoid going on the record with answers to questions about its clean energy goals and its commitment to keeping its rates affordable.

Thank you,

Tammy Lettieri
