COMPLAINT INFORMATION

Complaint: Other Complaint against Tampa Electric Company
Details:

The price of my electricity increased 12.7 percent from June to July 2021. As reflected in my August bill I used 86 kwh less but was charge \$11 more than the previous month. I found out that PSC allowed TECO to do this via a settlement. According to TECO the reason for this increased electricity charge is increased Natural Gas prices. This robbery by this Canadian company of Americans' money. I am not sure why you all let this happen when a layman's (mine) cursory glimpse at the natural gas market clearly shows that the increase is no greater than the NATURAL ebb and flow of the gas market. I have a link to a chart I will attempt to append to this note.

I am sure you all don't worry about a little price increases like this on your pockets. But to those of us who don't have access to bonuses and deep pocket friends, this is a tragedy. AND, it obviates PSC Mission Statement: "To facilitate the efficient provision of safe and reliable utility services at fair prices."

This price increase is not fair or warranted. Natural Gas Prices - Historical Chart
