Subject: Energy efficiency

Dear Ashley,

I don't know what FP & L's current goals are for improving energy efficiency but you might be interested in this report

Several studies show that improving energy efficiency is a key tool for decarbonization. The International Energy Agency's [global roadmap](#) to reach net-zero emissions by 2050, for instance, calls for efficiency improvements averaging 4% per year through 2030, about 3 times the average over the last 2 decades.
