Subject: We Can't Afford Higher Rates from FPL

Commissioner Art Graham,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

The use of our land for solar panels is not helping our atmosphere. The bounce off of the panels causes 85% of the energy to be rereleased into our atmosphere and warming the atmosphere unnecessarily. While a noble idea it is destroying land and air. Perhaps there is a better and cheaper idea.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to find work.

I urge you to reconsider this rate increase.
