NOTICE OF INTENT TO ISSUE PERMIT

The Department of Environmental Protection (Department) gives notice of its intent to issue an Environmental Resource Permit (ERP) in accordance with Part IV of Chapter 373, Florida Statutes (F.S.), and Chapter 62-330, Florida Administrative Code (F.A.C.)

The Department also gives notice of its intent to grant an easement to use sovereign submerged lands for the proposed activity, under Article X, Section 11 of the Florida Constitution, Chapter(s) 253, Title 18, F.A.C., and the policies of the Board of Trustees.

The applicant, Gulf Power Company (GPC), applied on July 29, 2019, to the Department for a permit, water quality certification, and authorization to use sovereign submerged lands owned by the Board of Trustees of the Internal Improvement Trust Fund (Board of Trustees) to construct a 176-mile, 161-kilovolt overhead aerial transmission line in northern Florida. Generally, the North Florida Resiliency Connection (NFRC) Transmission Line will follow existing linear facilities including FDOT (I-75, I-10, US90 and US41), local rural roads, and other utility corridors (Clay Electric Co-Op, City of Tallahassee and FGT). Generally, a 15-foot-wide easement will be required where the line is adjacent to non-limited access rights-of-way. Generally, a 60-foot-wide easement will be needed where the line is overlaid or adjacent to limited access rights-of-way. Total easement width varies along the transmission line corridor. The activity is located between two terminal substations in northern Florida. The transmission line will traverse from the existing Florida Power and Light (FPL) Raven substation in Columbia County at Latitude 30° 39' 53.43" north / Longitude 84° 54' 6.32" west, through portions of Suwannee, Madison, Jefferson, Leon, and Gadsden counties, to the existing GPC Sinai Cemetery substation in Jackson County at Latitude 30° 9' 45.88" north Longitude 82° 34' 20.22" west. The overhead aerial transmission line is proposed within and over wetlands and tributaries associated with several Class III waterbodies (some of which are Outstanding Florida Waters). The activity includes consideration of an application for 12 public easements containing 350,611 square feet.

This project is often referred by the general public as NextEra Resiliency project or Florida Power & Light Resiliency Transmission Line project. The project spans seven counties within north Florida, encompassing both the Northeast (NED) and Northwest Districts (NWD).

The Department will issue the environmental resource permit and lease, unless a timely petition for an administrative proceeding is filed pursuant to the provisions of Sections 120.569 and 120.57, F.S. The actual terms of the lease will be formally executed at a later date and shall include provisions for rents and such other provisions as normally are included in such lease. On the filing of a timely and sufficient petition, this action will not be final and effective until further order of the Department. Because the administrative hearing process is designed to formulate final agency action, the hearing process may result in a modification of the agency action or even denial of the application.

The application file is available online and can be accessed through the Department's Information Portal at: <https://www.fldepportal.com/go/home/>. If you have any questions or are experiencing difficulty viewing the electronic application, please call Tom Kallemeyn, Florida Department of Environmental Protection, 8800 Baymeadows Way West, Suite 100, Jacksonville, Florida 32256, thomas.kallemeyn@floridadep.gov, or 904-256-1616.
