Comments:

Hi, I want to express my strong objections to the high minimum bill proposals emerging from several Florida utilities. This is a blatant attempt to punish those of us providing power to the grid via rooftop solar. These companies are trying to preserve their monopoly on power generation at the expense of their customers. I understand the need for a minimum bill to maintain the grid, but not profits, and \$25-\$30 is ridiculously high. There is no way that is justifiable. Thank you for your service. Brian
