Subject: sewer system for little gasparilla island.

good afternoon. i am writing to voice an objection to the purposed system. there has not been enough studies done on the benefit of this system. like the mandatory water hook-up, the only person that will gain is Mr. Boyer. the cost to us home owners is extreme. couple that with home owners being responsible for the power to the grinding pump incase of a power failure is stupid. the purposed monthly fee of 179.00 dollars plus is twice the amount people pay on the mainland in charoltte county. we have owned this home for 32 years. it is a second home, which means NO home stead tax brakes . a septic tank failure on the island would be horrible . what about a sewer system failure. these have dumped millions of sewerage waste into our waterways, by most counties on the coast or rivers. WE STRONGLY OBJECT TO THIS PROJECT. mr. boyer has told me ,in person, these projects are his retirement program...off the backe of home owners. thank for your time....jim&arvilla lemanski 8620
