**Subject:** Docket # 20200226 -SU

Gentlemen:

I, Barbara Holmes, have been a full time resident of Little Gasparilla Island for the past twenty seven years. My property is located at 9496 Alborado. I formally object to the certification for this proposed sewer. I request that the PSC deny EU's application for waste water treatment on LGI.

1. Duty of county to provide wastewater service if needed and that need has not been determined
2. Homeowner would own grinder\$\$\$ which lasts approximately 5 years  
Other significant expenses involved with grinder defrayed to homeowner  
County would use vacuum system
3. Sewage backup extremely likely with grinder system due to frequent power outages  
Hurricanes/tropical storms could cause weeks of power outages  
Generators expensive and unreliable
4. No pro rating on connection fees!!!  
Some homeowners forced to sell or put lien on property

5. Potential of sewer pipes being broken a serious threat  
No roads, only sandy golf cart paths where heavy construction equipment and workmens' motorized vehicles are prevalent
6. Cost of water from EU higher than almost anywhere else in Florida  
(over \$110 per month)
7. EU wastewater service estimated at \$178.78 per month  
Rotonda pays roughly half that for both water and wastewater service!!!

Respectfully,

Barbara Holmes
