Subject: Septic issue on Don Pedro night islands

My name is Tim Daniel. I own 450 Bocilla Dr., Placida, FL. This is a home on Palm Island, formally known as knight and Don Pedro islands. I'm writing to object to the EU proposal for central sewer installment.

There are many reasons. I am not opposed to central sewer as I understand the environmental impact of septic systems. However, there are significant problems with the used proposal. This is not an exhaustive list, but includes the fact that it will include a 13–20,000 cost to each homeowner which will need to be paid immediately, a monthly cost of double the areas region for normal water and sewer systems, the huge traffic impact it will have because of the use of barges to access the island, the destruction of the natural peaceful environment of the island including the disruption of roads and front yards, is the requirement of the homeowner to pay the cost of the electrical upgrades necessary to run the new system as well as installing a generator to prepare for electrical outage outages, the inexperience of EU, they are claiming ownership of the property in my front yard to install the system, all property damage will be at my expense.

In short, I am not against central sewer but I am against how it is being done. In my opinion this should be part of why I pay huge taxes on my property. This should be done with taxpayer dollars with a Charlotte County oversight. It should not come out additional Expense to me personally. I strongly encourage you to reject this proposal.

Tim Daniel
