Subject: NARUC Meeting Request

Chairman Fay and Commissioners Graham and Passidomo,

I am emailing on behalf of Lucinda Notestine and Miranda Brannon with the Department of the Air Force's Office of Energy Assurance to request an introductory meeting on **Tuesday, February 15 at the 2022 NARUC Winter Policy Summit in Washington, DC.**

The Air Force is exploring a **solar + long-duration energy storage project at Tyndall Air Force Base** to increase the region's energy resilience during periods of normal operation and the base's energy resilience in the event of a grid outage. We would like to briefly meet with the commission to better understand the processes and requirements for rate-basing such a project, key commission staff with whom we could have follow-on conversations, and any state programs or incentives that may apply to this project, generally.

Please note, the Air Force is still in the very early stages of the planning processes. There are no docket items before the commission related to this effort. Our goal is to learn from the commission on how we could shape the project concept so it serves the needs of the region and the base.

We have availability at NARUC on the **morning of 15 February through lunchtime.** We could meet at the restaurant/bar at the Renaissance Hotel in between sessions.

Let us know if you have any questions and if you have availability to meet.

Sincerely,

Chris Murray
Advisor
Air Force Office of Energy Assurance
202-492-0924

Subject: We Can't Afford Higher Rates

Dear Andrew Fay,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for their customers across the state, hurting the most vulnerable in our communities the most. We urge you to rethink this decision and not increase our bills.

This past year has been challenging and unrelenting, and folks have spent it worrying; worrying about the health and safety of their families and friends; worrying about finding work or being safe at work; worrying about the future of the business they built from the ground up; and worrying about making sure that they could keep the lights and heat on at home. For many of us, the pandemic has changed all of our lives in ways we'll still likely be grappling with long after the pandemic comes to an end.

Nevertheless, for some reason, corporate greed seems to be more important than the sustainability of our communities and our livelihood. This was evident when FPL, among several other power companies resumed closing customer accounts due to non-payment during the second wave of the pandemic. Now, they want to increase rates for their most vulnerable customers. We can't allow companies to continue taking advantage of working-class families, and luckily, you have the power NOW to stop this.

Our families need relief, real solutions to the climate crisis and fair and affordable utility rates. By raising prices, FPL is treating energy as a commodity when it's a necessity. We are demanding that Florida Power & Light halt this unfair plan and that Florida's Public Service Commission require FPL to maintain fair rates for their consumers, and prioritize the communities they serve.

Sincerely,
Mrs. Stacy Noeth
