CUSTOMER COMMENTS

We are happy for our current system & don't feel the need for sewers. Why is Environmental Utilities being considered without other companies bidding on this job? First of all, the county should be responsible for the cost of installing a sewer system. If they are going to continue insisting on a sewer system for Palm Island then it should be open to a bidding process with upfront costs already determined. Environmental Utilities shouldn't be allowed to decide how the island operates without a majority approval by all homeowners. Saying they will determine the cost after the job is completed is completely unacceptable.
