Subject: FPL

I am a citizen of N.W. FL. You and your fellow commissioner should be deeply ashamed of yourselves for approving the price hike for Florida Power & Light. How do you even sleep at night knowing the horrible situation you have put my neighbors and myself in? Does it make you feel good knowing that families are going to have to choose between feeding their kids or paying their exorbitant electric bills? What about the elderly on fixed incomes? Some will have to make a choice between much needed medication or paying the light bill. You idiots did this during the worst possible of times. I guess you missed the part about the pandemic that's going on in the world. Shame on all of you! Take a good look at yourself in the mirror and say this: "I am a sorry piece of crap who deserves nothing good in life because I am playing a huge role in pushing people deeper into poverty for my own gain." You all are pathetic, sorry excuses for human beings.

Sincerely,
Chris Clark
