Subject: Re: Docket #20200226-SU Proposed sewer project for Little Gasperilla island

As a follow up to this e-mail with concerns stated in regards to the proposed sewer system I would like to reiterate the fact that Jack Boyer and EU has not secured any easements necessary for crossing my property at 8230 Little Gasparilla Island, this was stated on the hearing February 8th 51 minutes into the hearing and it is absolutely FALSE he has not compensated property owners for the necessary access to allow him to put in the proposed sewer system. I will be contacting my attorney to follow up on recourse and for being compensated if the proposed system is approved. I felt that the Public service commission and the county commissioner should be aware of this falsehood

Any questions or concerns concerning this matter you can call me at 813-310-5125 thank you very much

Commissioners and Clerk of the public service commission,

My name is Randy Simmons, I am a current owner of 8230 little Gasperilla Island, I am sending you this email in opposition to the proposed sewer project and Formally requesting that

the PSC deny EUs request for waste water service. There are many reasons for this request .below are just a few. Not a comprehensive list

1. EU has not Secured/ Purchases the necessary right of way for the project as a portion of my property would be necessary to complete the project EU DOES NOT HAVE RIGHT OF WAY to install infrastructure needed for this project.

2.I currently my property has a well functioning septic system that is a very low to NO impact to the environment and don't feel that this project is justified, additionally if it were to go through I feel I should be grandfathered in and not required to hook up to the system at the proposed exorbitant cost.

3. It has not been determined that EU has the financial ability to handle such a project and I feel that this project should be performed by Charlotte County to ensure system is up to standards if we are forced to go on a sewer system.

4 it is in question rather EU has the technical expertise to perform the construction and oversight of a project such as this SINCE THEY HAVE ZERO experience and have not Installed a system anywhere else comparatively. Additionally I don't feel that EU can provide a system that is affordable to the owners of property on Little Gasparilla island.

Thank you for you consideration in these matters as I request that the proposal be denied

Randy Simmons
