Subject: Little Gasparilla Island (LGI)- Waste water plan

Dear Commissioner,

The proposed plan for a central waste water system on LGI has a long list of negative issues and concerns which include, property rights, reliability, implementation, maintenance and cost, just to name a few. There has to be a better solution. If this system and associated cost were to be proposed for your neighborhood and your property would you support it?

Please reject this plan and give us time to explore better options.

Thank you for your time.

Sincerely,

Kelly Lyons
