Subject: duke energy

I am upset about how duke energy keeps raising our rates. It is bad enough that they went up on the customer service charge and they added an asset securitization fee, which by the way was no fault of ours, florida power tried to save money which in turn didn't work, so in 2009 they said they were going up on their rates for the decommission of the crystal river no.3 and the construction of one in south florida which was supposed to be and operational by 2015. Well, neither one happened and we are still being bilked for something that never happened. Come on people, enough is enough.. In December 2021 duke energy made a 4.410 billion dollar profit. They also charge one of the highest rates anywhere. In my opinion, there should be someone overseeing these greedy companies and have more regulations. I am confused at to how these companies(duke energy) can say the cost of coal or the cost of anything and still make a 4 billion dollar profit. My question is when are people going to get enough and start fighting back
