Ladies & Gentleman,

Please follow the recommendation of the PCS staff to deny the application. I feel among other issues that the installation of sewer would change the “look” of our beautiful little island for a generation, with the amount of clearing that would be necessary.

Thank you all for the attention to detail that has been shown though out this process.

As a builder, and homeowner, on the island, with three houses going up right now, I am encouraging my clients to use the Aerobic drip systems when possible, as I feel that this is a very environmentally friendly system.

Thank you again

Jeb Bergeron

As a Palm Island homeowner (290 Kettle harbor Dr), I wanted to express my gratitude to the staff on the recommendation of a denial for Environmental Utilities to be granted a wastewater certificate.

Thank You! Thank you, For your time and consideration regarding this matter. As a homeowner, I and my neighbors were opposed to having mandatory private sewer. As homeowners we are very conscientious about the care and upkeep of our septic systems and will continue to do so, as we love our island and the beauty it provides us and the birds and animals we share this paradise with. This is a special place and my opinion, sewer would have been costly and possibly caused the island to be more built upon, thus losing some of the natural environments for our bird and animal friends.

Thank you!!!! Kelly Lubē

We are writing to show our support for the staff recommendation to deny this application. During this process island residents have researched the issue from many perspectives: financial, environmental, etc. and presented intelligent research based information to support the negative impact that this will have on our island community. As is often the case it is the people nearest to the situation who can most clearly see the overall impact of an action. Your willingness and the staff's willingness to listen to our position is greatly appreciated. We urge you to go forward by supporting staff's decision to deny this application.

Deborah Lietzke and Robert Thompson
Island Residents for 20+ years

Dear Commissioner Passidomo,

Thanking you in advance for your upcoming vote and acceptance of staff's recommendation **that EU's application for a wastewater certificate be denied.**

I would like to comment on the outstanding volunteer "PUMP OUT" Program on Don Pedro Island, which my household has participated in since its inception.

Residents as well as myself, are willingly compliant with the program. We care about environmental issues, and we fiercely care about and personally protect the health of our island.

Thank you again for your time and consideration in dealing with this matter.

Sincerely,

Kjell Plotkin, Resident
481 Kettle Harbor Drive
Don Pedro Island

Dear Commissioner LaRosa,

Thank you for listening to the the many people who spoke against EU's proposed sewer project on on Little Gasparilla Island. As the owner of 8270 Little Gasparilla Island, I'm very happy that the panel has recommended denial of this project. I'm asking you to follow this recommendation and deny this proposal. I've owned the house on the Island since 96. Ten years ago, I was severely injured in a hunting accident and was unable to work for three years. During that time, I went back to school and got my masters in nursing education. I'm currently a nursing instructor at Hillsborough Community College. It was very difficult for me to hang onto to my little peice of paradise during that terrible time but I managed to do it. As you are aware, college professors don't make a lot of money! If this project is permitted, it will be financially impossible for me to keep the place. I am sincerely asking you to vote to deny the sewer project.

Dear Clerk and Commissioners,

My name is Kelley Allen, 331 Bocilla Dr, Placida, FL, located on Don Pedro/Knight Island in Charlotte County. I respectfully request that you DENY the application from EU and comply with the staff recommendation of the same.

As a homeowner I appreciate your consideration and review of all the documentation in opposition of EU installing a sewer system on the island. Our septic system is less than a year old. I participate in the PIE Batch Pump Out Program and will continue to be a good steward to our community and environment.

Thank you for your consideration.

Respectfully,
Kelley Allen
